OFFER 01

Amazon Launch System

For brands that aren't on Amazon yet. Covers everything from setup through launch and into full growth — no other offer needed.

INVESTMENT
$3,500 – $7,500
setup + monthly retainer

BEST FOR

- New to Amazon
- Has product ready
- 1–5 SKUs
- Food, beauty, fitness, lifestyle
- $1–2K ad budget available

The core idea
Build the car before putting gas in it. Amazon is the center of ecommerce and a brand has to be there, but launching without a solid foundation is just burning budget. This offer builds everything correctly from day one so that when traffic arrives, it converts.

HOW IT WORKS

1. **Build the foundation**
   Weeks 1–4
   Seller Central setup, SEO listing copy, product photography direction, A+ content via Pixii, FBA setup, Vine enrollment for early reviews, brand registry guidance, packaging and labeling review. Goal: a listing that converts when people land on it.

2. **Start the engine**
   Weeks 4–8
   Light PPC to capture existing demand, UGC creation and testing via Billo or JoinBrands, TikTok and Meta ad testing at low budgets ($500–1K) to identify winning creatives. External traffic starts feeding Amazon's algorithm with real signals.

3. **Add fuel when there's momentum**
   Weeks 8–12+
   Scale winning creatives, optimize PPC, introduce Sponsored Brands Video, build branded search strategy. PPC is layered in once organic ranking is moving, not before. Every dollar now amplifies something that's already working.

TIER 1 — LAUNCH ONLY · $2,500 ONE-TIME

Get your Amazon presence built correctly from the ground up. One-time engagement, no ongoing commitment. The goal is a live, converting listing — nothing more. Best for brands that want to establish an Amazon presence and handle growth themselves.

Seller Central setup Full account configuration, FBA enrollment, listing creation	**SEO listing copy** Title, bullets, description optimized via Helium 10 / Data Dive
Done-for-you images + A+ Main image, infographics, lifestyle via Pixii.ai	**FBA setup + Vine enrollment** Inventory plan, shipment creation, early review program
Packaging + labeling review FDA compliance, FNSKU strategy, prep workflow guidance	**Brand Registry guidance** Trademark pathway, enrollment setup, A+ eligibility

TIER 2 — LAUNCH + GROWTH · $3,500 SETUP + $1,500/MO · 3-MONTH MINIMUM

Everything in Launch Only, plus the full demand engine. After the listing is live, we build external traffic through UGC and paid social to feed Amazon's algorithm with real ranking signals. PPC is layered in once organic momentum is building — not before. This is where the real growth happens.

Everything in Launch Only Full Phase 1 foundation included	**UGC sourcing + coordination** 3–5 creators via Billo / JoinBrands, briefed and managed per cycle
TikTok + Meta ad testing Low budget creative testing to identify winners before scaling	**Amazon PPC management** Launched once listing has traction — not on day one
Creative scaling Winners get budget, losers get cut — ongoing optimization	**Monthly reporting** Rankings, ACOS, external traffic, conversion trends

ADDITIONAL COSTS — ALWAYS SEPARATE, PAID DIRECTLY BY CLIENT

Ad spend — Amazon PPC Tier 2 only — introduced in Phase 2 once listing is ready	$500 – $1,500/mo
Ad spend — TikTok + Meta Tier 2 only — testing budget to find winning creatives	$500 – $1,000/mo
UGC creator fees Tier 2 only — coordinated by SellerPro, paid by client	$300 – $800 per batch

Not a fit if…
Commodity product with no brand story, highly technical B2B, very low margin items, no inventory ready, or no budget for ad spend testing. This system only works when the unit economics support it. *Already on Amazon and stalled?* That's a different problem — see Offer 02.

OFFER 02 — STANDALONE ONLY

Amazon Rescue System

For brands already on Amazon that have stalled. This is not part of the Launch System — it's a separate engagement for brands that launched somewhere else and got stuck.

INVESTMENT
$2,500 – $4,000
setup + $2,000–2,500/mo retainer

BEST FOR

- Already on Amazon — not new
- Launched elsewhere, now stalled
- High ACOS, low conversion
- 20–200 reviews, rankings plateaued
- Burning PPC budget with no momentum

The core idea
This offer exists for one specific situation: a brand that got on Amazon, did the work, but hit a ceiling and can't break through. More PPC spend doesn't fix a conversion problem — it just accelerates the bleed. Stalled brands need a diagnosis first, a fix second, and external demand third. That's the sequence this system follows. If you haven't launched on Amazon yet, this isn't your offer.

HOW IT WORKS

1. **Diagnose before spending**
   Week 1–2
   Full listing audit — copy, images, pricing, conversion rate, PPC account structure, review quality and velocity. Identify whether the problem is the listing, the traffic, or the product-market fit. Fix what's broken before adding external traffic or you're sending people to a leaky bucket.

2. **Fix the foundation**
   Weeks 2–4
   Rewrite listing copy, refresh creative, restructure PPC to stop bleeding, accelerate review velocity. Introduce a temporary promotion or coupon if needed to stimulate conversion and send algorithm a signal that the listing deserves attention.

3. **Create external demand**
   Weeks 4–12
   UGC sourcing and testing on TikTok and Meta. Traffic driven to Amazon listing creates external ranking signals that PPC cannot replicate. Platform selection and creative strategy tailored to the product category — not every product belongs on TikTok first.

WHAT'S INCLUDED

Full listing audit Copy, creative, pricing, conversion, PPC structure review	**Listing rewrite** SEO copy refresh based on current keyword data
PPC restructure Stop the bleed, rebuild campaign architecture	**Review velocity strategy** Vine if eligible, email sequences, follow-up strategy
UGC sourcing + testing 3–8 creators briefed and coordinated per campaign cycle	**Paid social management** TikTok and/or Meta, platform chosen based on category
Monthly reporting Rankings, ACOS, external traffic, conversion rate trends	**Ongoing PPC management** Weekly optimization once campaigns are restructured

PRICING STRUCTURE

Audit + Fix (one-time) Diagnosis, listing rewrite, PPC restructure only	$2,500 one-time
Full Growth System (recommended) Audit, fix, UGC, paid social, ongoing PPC. 3-month minimum.	$2,500 setup + $2,000/mo
Ad spend (always separate) Amazon PPC + TikTok/Meta, paid directly by client	$1,500 – $3,000/mo
UGC creator fees Paid directly by client, coordinated by SellerPro	$300 – $1,000 per batch

Not a fit if…
You're not on Amazon yet. This offer is exclusively for brands that already have a live Amazon presence and are stuck. New to Amazon? Start with Offer 01 — the Launch System covers everything you need including growth.

OFFER 03

Fan to Content System

For brands with an existing audience or community that isn't being activated for content or Amazon growth.

INVESTMENT
$1,500 – $3,500
blueprint or managed retainer

BEST FOR

- Local or regional following
- Farmers market / fair brands
- Cult product with word-of-mouth
- Bootstrap budget
- Wants organic content without paying creator rates

The core idea
The most authentic UGC doesn't come from paid creators. It comes from people who already love the product. Brands with a real local following are sitting on a content army they're not using. This system turns existing fans into a structured, gamified content engine that feeds both social growth and Amazon ranking signals, at a fraction of paid UGC cost.

HOW IT WORKS

1. **Audience audit + activation blueprint**
   Week 1–2
   Map the existing audience — where are they, how engaged are they, what platforms do they use. Build the full fan activation blueprint: ambassador program structure, QR code strategy for physical touchpoints (fairs, markets, stores), content brief templates, gamification mechanics, and incentive framework.

2. **Launch the ambassador engine**
   Weeks 2–6
   Deploy QR codes and ambassador recruitment at physical touchpoints. Launch the incentive structure — product for content, discount codes, insider club access, leaderboard if volume warrants it. First wave of content starts flowing within 2–4 weeks of activation.

3. **Content coordination + Amazon amplification**
   Weeks 6–12+
   Coordinate incoming content, select best performers, brief next wave of creators, and direct traffic to Amazon listing. Fan content feeds Amazon's external traffic signal the same way paid UGC does, at dramatically lower cost. Layer in light paid amplification behind winning organic content.

WHAT'S INCLUDED

Audience audit Map existing fans, channels, engagement, activation opportunities	**Ambassador program blueprint** Full playbook — structure, scripts, incentives, gamification
QR code + touchpoint strategy Physical activation assets for fairs, markets, packaging	**Content brief templates** What to film, how to frame it, what platform, what CTA
Incentive framework Product for content, discount codes, insider access structure	**Content coordination (managed tier)** Ongoing creator management, content selection, brief refresh
Amazon traffic strategy Direct fan content to listing, track ranking impact	**Light paid amplification** Boost winning organic content on TikTok or Meta at low budget

PRICING STRUCTURE

Blueprint Only (advisory) Full playbook delivered, brand executes themselves	$1,500 one-time
Blueprint + Launch Playbook plus SellerPro builds and deploys all assets	$2,500 one-time
Full Management (recommended) Ongoing content coordination, creator management, reporting. 3-month min.	$2,500 setup + $1,500/mo
Paid amplification (optional) Light budget to boost winning organic content	$300 – $800/mo

Not a fit if…
The brand has no existing audience or community to activate. This system accelerates what's already there, it doesn't manufacture it from zero. For brands starting from scratch, Offer 01 or 02 with paid UGC is the right path.

THE BIGGER PICTURE

How the three offers connect into a growth journey

These aren't three versions of the same thing. Each one is built for a specific situation. A client reads their offer and it should feel like it was written entirely for them — because it was.

Entry point A	Entry point B	Entry point C
New to Amazon, no audience	**New to Amazon, has a following**	**Already on Amazon, stalled**
Offer 01 only. Full launch through growth, all in one system. No other offer needed.	Offer 01 plus Offer 03. Launch correctly and activate existing fans at the same time. Best ROI on a bootstrap budget.	Offer 02 only. Diagnosis first, fix second, growth third. Offer 01 does not apply — they already launched.

The common thread across all three: Amazon is the engine, but external demand is the fuel. Brands that only run Amazon PPC are idling in a parking lot. Brands that connect off-platform demand to on-platform conversion are the ones that build real organic ranking and real long term margin.

That connection is what SellerPro sells. Everything else is execution.
